## Education

---

### Sapienza University of Rome

Rome, Italy

*Bachelor's Degree, Computer Science*

*Sep 2023 - July 2026*

- 29.60/30 weighted GPA
- Recipient of the “Studente Meritevole” merit scholarship
- Relevant coursework: Theory of Computation, Mathematical Logic, Algorithm Design, Programming Language Theory

### Liceo Classico T. Tasso

Rome, Italy

*High School Diploma, Classical and Ancient Studies*

*Sep 2018 - July 2023*

- Graduation mark: 100/100 cum laude

## Research

---

### Undergraduate Thesis: “*Complexity Characterization for Norm Synthesis in ATL\**”

*To be discussed*

## Experience

---

### Student Collaboration Grant:

2025

*Department of Computer Science*

#### – Assistant to the Third Mission Coordinator

- Collected and categorized Department activities, maintained updated records, and supported outreach initiatives.

#### – Public Outreach Assistant

- Reorganized the Department’s website, implemented automation scripts to improve usability, updated and translated content.

### Faculty Assembly Student Representative

2024 - 2026

*Faculty of Information Engineering, Informatics and Statistics*

#### – Event Organization:

- “*Digital Freedom*” Seminar: co-organized a seminar on digital rights featuring the founder of ParrotOS (Lorenzo Faletra); co-managed logistics, and moderation; created promotional graphics.
- *Distinguished Lecture (Dr. Richard Stallman)*: collaboratively secured Dr. Stallman as a guest speaker, successfully inviting and hosting him for a lecture on Free Software.
- “*L<sup>A</sup>T<sub>E</sub>X Lab*” Workshop: helped in designing and delivering a two-session technical workshop on academic writing, mathematical typesetting, and advanced document structure.

### Department & Teaching Area Student Representative

2023 - 2026

*Department of Computer Science*

- Served on the **Teaching Area Council** (2023 – 2025) and the **Department Council** (2024 – 2026), participating in governance decisions regarding teaching policy and curriculum development.
- Gathered feedback from students, reporting concerns and raising issues to improve the learning environment.

# Extracurriculars and volunteering

---

## Open Day Speaker - Department of Computer Science

Feb 20, 2025

I spoke at the department's annual open day, sharing my experience as a Computer Science bachelor's student. I gave a personal testimonial, offered advice to perspective applicants, and helped provide insight into the course and university life.

## Sapienza Students Network - Staff Member and Contributor

2024 - 2025

*Official site / GitHub*

- Collaborated on an independent student-led initiative fostering collaboration and community.
- Assisted in maintaining and organizing open-source learning materials, contributing to GitHub repositories covering multiple course subjects, sharing resources, exercises and past exams to support peers' academic success.

# Projects

---

## Open-Access University Notes Repository

GitHub

Throughout my Bachelor's degree, I have maintained a public repository of course notes in Markdown, LaTeX, and handwritten formats, aiming to support open education and make learning resources freely accessible.

## Interactive Hoare Logic Proof Assistant - Standard ML

GitHub

Developed an interactive SML tool to verify imperative programs via Weakest Precondition (WP) calculus and a non-linear proof tree navigator. Integrated **sequentur-sml**: a custom decision procedure for linear arithmetic implications using Fourier-Motzkin Elimination, GCD tightening, and DNF normalization (including a backtracking "witness mode" to generate counterexamples).

## Other Course Projects

C, Java

- **Energy storms: High-Performance Parallel Simulation:** developed a large-scale physical simulation optimized for hybrid CPU (MPI+OpenMP) and GPU (CUDA) architectures, focusing on domain decomposition and communication-computation overlap. [GitHub](#)
- **JBubbleBobble:** recreated the classic arcade game using the MVC architecture, Java Swing, and Observer design patterns. [\(GitHub\)](#)
- **Operating Systems II:** built a C precompiler parser and a multi-threaded client-server application utilizing sockets for encrypted data transmission and semaphores for synchronization. [\(GitHub\)](#)

# Languages

---

**Italian** Native proficiency

**English** C2 (Proficiency) - IELTS Academic Band 8.5

**French** Elementary proficiency (approx. A1-A2)

# Interests

---

**Research:** Classical and computational logic, formal methods (automata/game-theoretic approaches), automated deduction, programming language theory.

**Personal:** Literature, philosophy of language, cinema, film photography, and graphic design. Tea collector. Former competitive volleyball player (9 years).
